through Colonel Geary to arrange for a meeting of and an OXCART Operations Officer to visit SAC Headquarters and gain the information that is required. Once this information has been reviewed by this headquarters, it can then isolate those areas or procedures where compromise could take place, and we can then take steps with SAC to develop operating procedures which would prohibit the identification of an OXCART operation in the making.

4. Since the wherewithal for the continued investigation of this subject lies within Operations Division, Communications and Intel, it is suggested that this planning can most expeditiously and most properly take place as a function of your office. It is therefore requested that you assume responsibility of this task and the Programs Staff will withdraw.
